

Disclaimer on AI use

The EPO employs Artificial Intelligence (AI) for a wide range of purposes, including content creation, event delivery, (live) translations into the EPO official language and most of the languages of the EPO countries, and in some cases, virtual presenters generated by AI. AI use by the EPO follows strict principles and rules set out in the EPO AI Policy, ensuring respect for due process rights, the right to the protection of personal data and privacy and principles of public order, and complies with the EPO regulatory framework.

While our AI tools generally deliver good quality, they may occasionally produce inaccuracies. For AI-translations, we are working on improving the tool to cover as many languages possible. Nevertheless, please rely on the original language record as the official version. AI created content will be clearly marked as such; please do not rely exclusively on AI-created content but always seek out original sources. If you notice any important inaccuracy, please let us know at Events@epo.org.

By participating in our events or the production of the content, you acknowledge and accept our use of AI as described above.
